

# ANURAG YADAV

## Software Developer (React.js — Spring Boot)

☎ +91-7390882703 ✉ [ay073501@gmail.com](mailto:ay073501@gmail.com) 🔗 [linkedin.com/in/anurag-yadav](https://linkedin.com/in/anurag-yadav) 🐙 [Github.com/in/anurag-yadav](https://Github.com/in/anurag-yadav)

### Summary

---

Aspiring Software Developer with hands-on experience building full-stack web applications using Spring Boot, React.js, MySQL, and MongoDB. Strong foundation in Data Structures, Algorithms, Object-Oriented Programming, and RESTful API development. Passionate about writing clean, scalable code and solving real-world software engineering problems. Seeking an entry-level Software Developer role to contribute to innovative engineering teams while continuously learning modern technologies.

### Education

---

**Dr. A.P.J. Abdul Kalam Technical University (AKTU)**

**2023 – 2027**

*B.Tech in Computer Science and Engineering*

*Current CGPA: 7.95*

**St. Thomas Inter College (Jaunpur)**

**2020 – 2022**

*Intermediate: 75% — High School: 81.5%*

### Technical Skills

---

**Programming Languages:** C, C++, JavaScript

**Frontend:** HTML, CSS, JavaScript, React.js, Tailwind CSS, Bootstrap

**Backend & APIs:** Spring Boot, REST APIs, Spring Security

**Databases:** MySQL, MongoDB, Hibernate/JPA

**Cloud & Operating Systems:** Cloud Fundamentals, Windows, macOS

**Core CS Fundamentals:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

**Troubleshooting:** Debugging, Root Cause Analysis, Log Analysis, API Testing

**Tools:** Git, IntelliJ IDEA, Postman, MySQL Workbench, MongoDB Atlas, VS Code

### Projects

---

**Financial Intelligence System** | *React.js, JavaScript, Spring Boot, Spring Security, Hibernate, Maven, MySQL*

- Architected a full-stack personal finance application leveraging Spring Boot and React.js to enable seamless, real-time tracking of income, expenses, and savings.
- Integrated the Google Gemini API to provide AI-powered explanations and contextual insights based on application-generated financial data.
- Engineered dynamic transaction categorization and budget management modules, utilizing Hibernate/JPA and MySQL for optimized data persistence and rapid query execution.
- Implemented secure user authentication and data protection by deploying Spring Security mechanisms, ensuring robust access control across financial summaries.

**ERP Management System** | *HTML, CSS, JavaScript, Spring Boot, MySQL*

- Engineered a centralized ERP platform using Spring Boot and MySQL to automate administrative operations, course management, and record maintenance for students and faculty.
- Implemented secure user authentication and optimized database schemas, reducing data redundancy and ensuring low-latency access to records.

### Certifications

---

- **Oracle Certified Associate – Generative AI (2025):** Gained knowledge of Generative AI concepts, Large Language Models (LLMs), prompt engineering, and AI-powered application development.
- **Cisco Networking Academy – Cybersecurity Essentials (2026):** Learned cybersecurity fundamentals including network security, threat detection, risk management, cryptography, and security best practices.

### Technical Focus

---

- **Software Engineering:** Object-Oriented Design • Design Patterns • Software Architecture • Problem Solving • Debugging • SDLC • Code Quality • Operating Systems • DBMS
- **AI & Cloud:** Generative AI • LLMs • AI Agents • Prompt Engineering • Cloud Computing • CI/CD • GitHub Actions • SonarQube • Linux • Application Deployment Understanding • Version Control
